SUMMARY

Computer Science undergraduate and MERN Stack Developer with experience building scalable full-stack applications using MongoDB, Express.js, React, and Node.js. Strong problem-solving and DSA foundation with hackathon leadership experience. Open to internship opportunities to apply and expand software engineering skills.

EDUCATION

Sanjay Ghodawat University

B.Tech in Computer Science and Engineering – CGPA: 8.4/10

Vidyamandir Jr. College

12th – PCM + Electrical Maintenance

Venkateshwar Public School

10th Grade

Kolhapur, Maharashtra

Aug 2023 – May 2027 (Expected)

Islampur, Maharashtra

June 2021 – April 2023

Peth, Maharashtra

June 2015 – April 2021

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Bootstrap, REST APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code

Concepts: Full-Stack Development, JWT Authentication, Role-Based Access Control, Real-Time Inventory Systems, Data Structures, Object-Oriented Programming, Database Management Systems

PROJECTS

GrocerFlow – Smart Grocery Management System | *MERN, JWT, REST APIs*

- Engineered a full-stack inventory and billing system with real-time stock tracking and automated GST-based invoice generation.
- Built secure authentication and role-based access using JWT and bcrypt.
- Developed an analytics dashboard for sales insights, improving operational visibility.
- Implemented low-stock alerts and automated reorder system for efficient inventory control.

FlowMind AI – AI-Powered Productivity & Task Manager | *MERN*

- Developed an AI-driven task management system that converts goals into structured, actionable tasks.
- Designed intelligent scheduling with auto-rescheduling and smart daily planning features.
- Implemented a productivity scoring system and “Study Mode” to enhance user focus and efficiency.
- Built scalable full-stack architecture using MongoDB, Express.js, React.js, and Node.js.

Homes – Full Stack Web Application (Airbnb Clone) | *MERN, Passport.js, Cloudinary*

- Built a full-stack web platform with property listings, reviews, and user authentication.
- Implemented secure authentication using Passport.js with session management.
- Designed RESTful APIs and CRUD operations with Mongoose schema validation.
- Integrated Cloudinary for optimized image storage and delivery.

CampusSetu – College Management System | *Web Application*

- Developed a centralized system for managing student, faculty, and administrative workflows.
- Implemented role-based access for students, faculty, and administrators.
- Built modules for attendance tracking, assignments, grade management, and notice board.
- Integrated an AI chatbot for query handling and academic assistance.
- Led a team of 5 members (Cyber Squad) during hackathon execution.

HACKATHONS & LEADERSHIP

Google Student Ambassador

Campus Technology Community Lead

- Represent Google programs on campus, organize workshops, and foster a student developer community.

Event Coordinator, ACSES

Association of Computer Science & Engineering Students

- Planned and executed technical events including coding contests, workshops, and seminars for 200+ student members.

Finalist – HackNova 24-Hour Hackathon | Team Lead, CampusSetu Project

Finalist – RIT Ideathon 2025 | KrishiRakshak AI Agriculture Innovation

Top 15 – Webverse Hackathon 2024 | Out of 50 competing teams

Sanjay Ghodawat University

Aug 2025 – Dec 2025

Sanjay Ghodawat University

2025 – Present

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Full-Stack Web Development – Apna College (Completed)
- Data Structures & Algorithms – Apna College Sigma Batch (In Progress)

Coding Achievements

- Completed 30-Day Daily Programming Challenge (DPC 2025): solved and published Java DSA problems daily on GitHub, demonstrating consistency and self-discipline.
- Active problem solver on LeetCode with focus on arrays, strings, trees, and dynamic programming.
